M/R SUPPLEMENT

MILK REPLACER SUPPLEMENT FOR BABY CALVES*

Every dairyman knows that getting your calves off to a right start is important. Measuring total blood protein is one way to determine the health status of calves. This blood protein measurement shows how much immunoglobulin absorption is associated with the neonatal calf. Therefore, having more calves pass this type of test, puts more money in your pocket.

RECOMMEND USE:

Feed By-O-reg+ M/R Supplement at the rate of 0.5 to 1 gram per head per day to dairy and beef calves receiving milk replacer. Consult with your area Advanced Ag Products feed specialist for additional feeding directions.

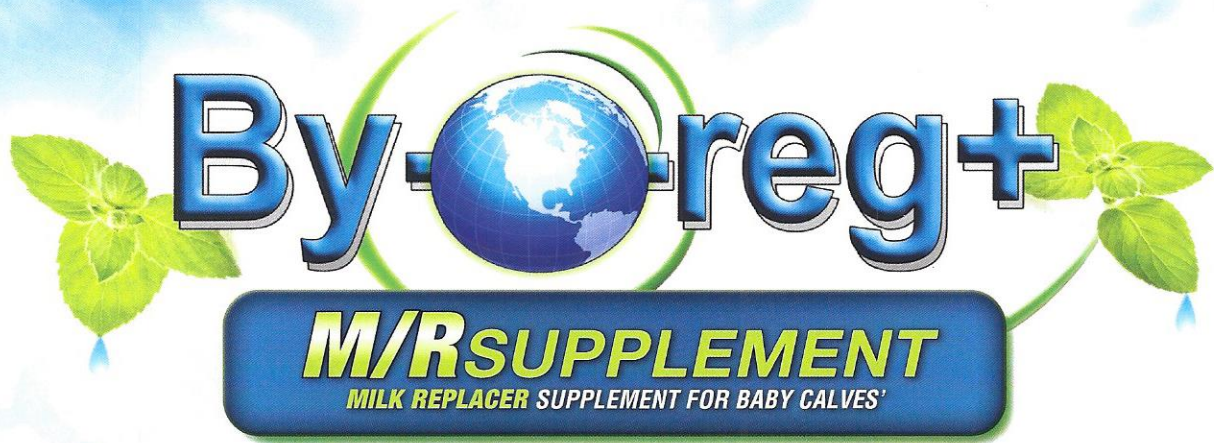

AVAILABLE IN: 10 LB. / 25 LB. RESEALABLE PAIL
