## ISS MISSILE

DEER SPIKE ATTRACTANT

NO WICK  
NEEDED

- ⦿ Slow-released Doe in Estrus urine
- ⦿ Attracts large bucks early to post-rut
- ⦿ No Ropes, No sprays Needed.

### How to Use:

**Choose the Spot:** Drive the spike in the ground where deer already travel — trails, scrape lines, edges, water sources, or near your stand/blind location.

**Keep Your Scent Off:** Handle as little as possible when opening. Use gloves or keep the wrapper between your hand and the spike.

**Installation:** Push or hammer the spike 4–6 inches into the ground so only the top is exposed.

**Kickstart the Draw:** For first-time placement, add a PrimalForce™ Wildlife Block as extra enticement.

**Location Tip:** Position within shooting distance of your hunting setup or camera site to establish a pattern.

**Longevity:** Scent and flavor release over time. Activity will vary with deer density, weather, and natural forage.

**Ingredients:** Corn gluten, Magnesium oxide, Soybean hull, Doe in estrus Urine\*, Glycerin

Not for human consumption. Store in a dry, cool place for optimal freshness.

**Check Local Laws:** Always follow your local game and fish regulations regarding attractant placement and feeding wildlife.

**\*Sourced from a facility that uses RT-QulC testing and CWD-free certification standards.**

2 SPIKES
